Drive Over Gates Like They Do Not Exist

## Benefits:

- r Cross gates easily in both directions.
- r Use in existing gate openings as narrow as 20 feet.
- r Easy installation and low maintenance.
- r No wires to let down.
- r Save time, reduce labor, and increase efficiency.

## Features:

- r Fiberglass, aluminum, and steel construction.
- r Takes only minutes to install.
- r Functions well on all types of terrain.
- r Patented by the United States government.
- r 45-Day money back satisfaction guarantee.

## Eliminate The Need For Opening Gates

The Pivotal Post ATV GATE is a patented post and gate system that allows ATV four-wheelers\* to simply drive over an installed Pivotal Post ATV GATE. Checking livestock has never been easier or more efficient. Save time and eliminate worries about livestock getting out through a gate that has been left open.

The ATV GATE can be installed in existing gate openings that are as narrow as 20 feet! It can also be installed in larger openings, leaving room on either side to allow the passing of a larger vehicle.
